The Windy City Has Gone To The Dogs...

Once again members of the Burgin Construction team, along with more than 60,000 other industry professionals, attended the Kitchen & Bath Industry Show and Conference. This year's show was held April 20th through 23rd in Chicago and was the largest and most successful to date, with all the latest in cutting edge design and products.

With so much to see and do it was practically impossible to see it all however a few exhibits definitely stood out and caught our attention. One of those was the announcement of new colors from DuPont. For 2006 they have added six new Corian colors and three new Zodiaq colors. The new colors are all warm Earth tones designed to reflect the hues of nature and include Granola, Oat, Pine, Rye, Silver Birch, Winter Wheat, Chestnut, Saddle Brown, and Woodland Grey. If you'd like to see a sample of these new offerings please call us at 714-558-1094 to visit our design center.

We'll See You At The Show!

Burgin Construction will once again be featuring an exhibit at the 52nd Annual Southern California Home and Garden Show August 19th – 27th at the Anaheim Convention Center. If you would like free VIP passes to the show please call our office at 714-558-1094 ext. 715 and leave your name and address and we will be happy to provide two passes per family for the show. Tickets will also be available at the convention center for \$10 per adult, \$8 for seniors 60 years and over, and \$4 for children 6-12. Children 5 and under are free.

The event will feature exhibits from area companies to assist homeowners looking for innovative ideas for remodeling, decorating and landscaping. Hundreds of businesses and their services will be on display along with many of the latest and greatest products. Special attractions, seminars and a celebrity line-up are also included to make this one of the best home and garden shows on the West Coast.

Another eye-catching display was that of MTI whirlpools. The employee-owned company is an industry-leading manufacturer of custom acrylic whirlpool baths, kitchen and utility sinks and shower bases. From practicality to extravagant, they offer everything the ideal bath requires with more than 80 air bath models and specialty items such as the Jentle Jet Laundry Sink and Jentle Ped Foot Spa.

MTI's Jentle Pet Spa for dogs however, stole the show at the conference with its generously sized bathing well, shelves for supplies, hand-held shower and a self cleaning whirlpool system. With this innovative new product in their home every pet can feel like Doggy Warbucks!

The keynote speakers for the 2006 KBIS show featured Earvin "Magic" Johnson; Dr. Andrew Tuck of Applied Research and Consulting in NY; Carolyn Kepcher, Executive Vice President of the Trump Organization; award-winning designer and best-selling author Cynthia Rowley; lighting expert James Benya; Ann Sacks, founder of Sacks Tile; Thomas Overthun of IDEO; Drew Ellen Lawlor of CLP Interiors, Jack Uldrich of the Nano Veritas Group; Ken Wilson, founder of Envision, and more.

New and Notable Products:

Angle Power Strip—

Decisions, decisions, decisions. Homeowners have more than their share of these when planning their remodel and though this innovative new product adds yet another, the design and functionality makes it one of the easiest decisions you'll make.

The new Angle Power Strip from Task Lighting places outlets right where you need them and not where you don't. No more cumbersome cords all over the place and no unsightly or costly outlets in your tile, granite or stone backsplash. Your outlets will be placed in a convenient location beneath a cabinet, alongside a mirror or tucked behind edging. Call us today for more information on this wonderful new product!

Saving Money Or Saving Your Sanity?

If you're planning on remodeling your home, this is the question you must ask yourself. Do I want to save money or my sanity? Sometimes a homeowner will decide to save money by taking on the role of General Contractor on their home renovations. Though not impossible, it can be one of the toughest jobs you've ever taken on.

Overseeing a home remodel entails more than just calling someone up and having them come in to do the work. You will need subcontractors for each individual part of the job such as architecture, plumbing, cabinet building, appliance installation, framing, painting, etc. This means that it will be your job to obtain quotes, research each company and find the right one for your project, schedule each phase of the project and make sure that all work is being completed according to your specifications and plans.

And what if there are problems? If you are acting as your own General Contractor, those problems are all your's to solve. Would you know what to do if on the day of installation the granite installer tells you that your base cabinets are installed incorrectly and he can't install the granite? What about if the plumber you contracted just doesn't show up and is nowhere to be found or the drywall is behind schedule and the painters are already booked for the next 6 weeks with other jobs and can't reschedule your project until then?

Many homeowners have found out the hard way that by taking on the General Contractor role they end up paying more in the long run due to problems that arise along the way. The job of the General Contractor is to handle any situation that comes up during your project whether it's scheduling issues, materials, or installation problems. Even if you plan on being on-site through much of the remodeling process it can be a life-saver to have a General Contractor who deals with these types of situations on a regular basis oversee the project. If you're thinking of remodeling your home and would like to speak to a reputable local General Contractor about what we can do for you give us a call at 714-558-1094 to schedule a no obligation in-home consultation.

The Center Of Burgin Construction...Our New Design Center!

Continuing our commitment to excellence in customer service Burgin Construction proudly announces the opening of our new design center. Located in our corporate offices at 630 S Grand Ave, Santa Ana, CA, the new design center features custom cabinetry, DeWils cabinetry, finish samples and much more. It can be a wonderful resource in planning for your remodel and will allow you to get a look at some of the finished products before they are ever ordered.

Just call us at 714-558-1094 to schedule a time to come in and one of our helpful staff members will be happy to show you around the design center and assist you in making decisions for your next project. Design Center hours are generally Monday through Friday from 9:00 am to 5:00 pm, however we do ask that you make an appointment to ensure that someone will be there to assist you.
